

Compassionate Care, Cost- Effective Results

Our clinical services are built on compassionate care and professional oversight. We collaborate with our Berkley businesses with a shared, vested interest in providing cost-effective, high-quality care that focuses on the injured worker's well-being and a timely return to health.

Our Clinical Services

We provide a comprehensive and integrated suite of medical management services. Our human touch is paired with smart technology and strategic vendor relationships to maintain continuity and drive superior outcomes.

Medical Bill Review

We utilize sophisticated technology and a customizable, integrated workflow to aid in cost reduction while maintaining good outcomes. This includes collaborating with multiple vendors for fee schedule and Usual, Customary, and Reasonable (UCR) repricing, leveraging our proprietary Body Part Mapping system, and using expert Nurse/Code Audit Review.

Case Management

We take a caring and compassionate approach to Case Management, acting as an advocate for injured workers. Our certified nurse case managers focus on outcomes, helping to decrease claims cost and duration by guiding the injured worker through the necessary medical and disability case management.

Pharmacy Benefit Management (PBM)

Our PBM service provides real-time claim reviews and high-level oversight. We support the safe and appropriate prescribing of medications, offering a significant purchasing power advantage that helps control costs.

Berkley Care Network

We manage the Berkley Care Network to provide injured workers access to quality providers. This is a crucial element in providing and managing care that is both timely and effective.

Why BMMS

With experts spanning medical care, bill review, pharmacy, and technology working together, we blend our expertise with innovation and technology. We act as an extension of our Berkley businesses' teams, providing expert, data-driven solutions to optimize care and control costs.

-
- ✓ **Caring & Compassionate Expertise:** Our commitment to the injured worker is at the heart of everything we do. We have their best interest in mind, striving to help workers get back to their jobs faster and healthier.
 - ✓ **Predictive Innovation:** We use proprietary predictive models to see patterns in care and develop a path forward.
 - ✓ **Collaborative Strength:** As an integral service provider, our goals are perfectly aligned with the Berkley businesses we support, providing cost-effective and high-quality service.
