# Case Management

The Berkley Medical Management Solutions (BMMS) Case Management team is dedicated to Care, Compassion and Collaboration ("the three C's"), acting as an advocate to help injured workers get back to their lives faster while achieving significant cost containment.

## Telephonic Case Management

Our Telephonic Case Management (TCM) connects expert nurses with injured workers to provide guidance and coordination remotely. Our TCMs are passionate about patient care and utilize their medical background to aid the injured worker on the correct path to recovery.

The team is comprised of highly skilled nurses who have been trained in both medical and disability management. Utilizing early intervention, cost containment resources, education and collaboration to decrease claim costs and duration.

**How it Works** −

Our TCM model is designed for early intervention and seamless integration, leveraging technology and clinical expertise to drive down claim duration and cost.

**Proactive Engagement and Early Intervention** +

**Nurse-Driven Expertise** +

**Medical and Disability Management** +

**Seamless Collaboration** +

**Commitment to Growth** +

# Why BMMS

With experts spanning medical care, bill review, pharmacy, and technology working together, we blend our expertise with innovation and technology. We act as an extension of our Berkley businesses' teams, providing expert, data-driven solutions to optimize care and control costs.

- ✓ **Caring & Compassionate Expertise:** Our commitment to the injured worker is at the heart of everything we do. We have their best interest in mind, striving to help workers get back to their jobs faster and healthier.
- ✓ **Predictive Innovation:** We use proprietary predictive models to see patterns in care and develop a path forward.
- ✓ **Collaborative Strength:** As an integral service provider, our goals are perfectly aligned with the Berkley businesses we support, providing cost-

effective and high-quality service.
